1. Create an Author component which will have 3 fields Author Name-single line text field-Mandetry, Author Bio-multiline text field-Mandetry, Dob-date picker-Mandetry. create the component with above dialog fields

2. Fetch these values using htl properties tag>

Author-Name

	Name ▲	Type	Value	Protected	Mandatory	Multiple	Auto Created
1	fieldDescription	String	Enter Author Name	false	false	false	false
2	fieldLabel	String	Author Name	false	false	false	false
3	jcr:primaryType	Name	nt:unstructured	true	true	false	true
4	name	String	./authorName	false	false	false	false
5	sling:resourceType	String	/libs/granite/ui/components/coral/foundation/form/textfield	false	false	false	false

| Name maxDate | Type String | Value today | Multi | Add | » |

Author-Bio

	Name ▲	Type	Value	Protected	Mandatory	Multiple	Auto Created
1	fieldDescription	String	Enter Author Bio	false	false	false	false
2	fieldLabel	String	Author Bio	false	false	false	false
3	jcr:primaryType	Name	nt:unstructured	true	true	false	true
4	name	String	./authorBio	false	false	false	false
5	sling:resourceType	String	/libs/granite/ui/components/coral/foundation/form/textarea	false	false	false	false

DOB

	Name ▲	Type	Value	Protected	Mandatory	Multiple	Auto Created
1	displayedFormat	String	DD MMMM,YYYY	false	false	false	false
2	fieldDescription	String	Select DOB	false	false	false	false
3	fieldLabel	String	DOB	false	false	false	false
4	jcr:primaryType	Name	nt:unstructured	true	true	false	true
5	maxDate	String	today	false	false	false	false
6	name	String	./dob	false	false	false	false
7	sling:resourceType	String	/libs/granite/ui/components/coral/foundation/form/datepicker	false	false	false	false

3. What is Dialog validation how to use them?

- Dialog validation ensures that fields are filled correctly.
- The required="{Boolean}true" in dialog.xml makes fields mandatory.
- We can add custom validation using JavaScript (clientlibs).

4. What is client lib?

AEM Client Libraries (ClientLibs) manage CSS, JS, and other front-end assets.
ClientLibs are stored in:
ui.apps/src/main/content/jcr_root/apps/<your-project>/clientlibs/

5. What is extraclientlib and how to create custom ?

- ExtraClientLib is used when you want to load additional styles/scripts separately.
- It can be defined by using extraClientLibs in the component's cq:dialog node.

6. Creating Author, drag and dropping the Author
